

MOUNT PLEASANT FARM AND FORESTRY

(located at MOUNT PLEASANT FARM which is the old site of Mount Pleasant Trees)
ROCKHAMPTON , BERKELEY, GLOS. GL13 9DU

Telephone: 01454 260111 Please note this phone number is only for ordering items from this sheet. (No one will be available to answer the phone between Oct 20 and Nov 16.)

The items in this list are in addition to those listed in the **MOUNT PLEASANT TREES CATALOGUE** which is a separate business run by our son and daughter in law. To contact **MOUNT PLEASANT TREES** please phone **01454 260348** or see their website **www.mountpleasanttrees.com**

The trees are available from early November until mid-late March. An appointment is essential at a mutually convenient time to collect trees and several days notice may be required because for some of the large specimens we have to hire a J.C.B. with special lifting buckets to dig them.

Mount Pleasant Farm and Forestry are UNABLE to accept credit or debit cards and payment must be by cheque or cash on collection. **ALL PRICES EXCLUDE VAT SO THIS MUST BE ADDED TO CALCULATE TOTAL**

ALL TREES ARE HEALTHY WHEN SOLD –But as has always been our policy we cannot guarantee the successful growth following transplanting. (we would expect 90%+ success with most species, assuming transport, handling, planting and subsequent aftercare is to proper standards)

Mount Pleasant Farm and Forestry **will not be open for business until November 16 2009**

Large Specimen and Semi- Mature Trees

Most are 8-15 years. old and up to 20ft high. They are all supplied as dug, which in most cases will mean with quite a lot of soil attached to the roots. The larger ones have a trunk circumference of about 30 cm. or more.(10 cm. or 4in. diameter. Measured at 1 metre above ground level. Most will have been transplanted or undercut at least four times. All these trees are grown here and are significantly cheaper (often half the price or less) of other large tree suppliers. Please telephone if you would like further details of : exact height, girth, bushyness etc. The price reflects the age, size, rarity and the degree of symmetry. We have some cheaper ones of some species which are asymmetric in shape, these are ideal for economical screening.. The conifers need especially careful handling and may need protection from wind damage when transporting in the first few months after planting.

All the larger sizes cannot be transported in anything smaller than a 10ft long trailer, drop-side Transit, or flat bed lorry. We can advise on other transport possibilities. We can assist with tractor or fork lift loading (most are too heavy to man-handle). It is impossible to load into closed sided lorries or vans. Because of the high costs of labour and machinery it is unlikely that we can take orders for less than £100 total from this list of large trees. Prices are approximate indications and will vary from one specimen to another, we will of course quote you the exact price of any tree chosen. For most species we only have two or three specimens available, In the cases of : Hornbeam, Limes, Oaks and Yew we have many specimens available.
